

# CHEMTREAT AH1

## PRODUCT DESCRIPTION

CHEMTREAT AH 1 is an inhibited acid descalant for the removal of scale deposits and iron oxides from a wide variety of boilers and other heat exchange plant whilst leaving the parent metal untouched.

	Units	BCI Specifications	Test Methods
Appearance	-	lemon/orange liquid	ASTM-E2680
PH as supplied	-	<1.0	ASTM-D1293
Specific gravity	g/cm <sup>3</sup>	1.15	ASTM-D891

## TREATMENT AND DOSAGE REQUIREMENTS

For removing hardness deposits, a sample of scale should, if possible be removed from the plant and placed in a solution of the solvent at the temperature at which the clean will be carried out.

The concentration required is generally in the range of 5-15 % of water depending on the quantity and characteristics of the scale being removed.

## PRODUCT BENEFITS

Effective removal of hardness deposits.

Effective removal of iron oxides.

Highly concentrated so cost effective.

Liquid product easy to use.
